SONY D N

Bangalore, Karnataka
+91 7892908427 | dnsony939@gmail.com | LinkedIn | GitHub

Professional Summary

Motivated Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with skills in Python, Machine Learning, Data Analysis, Deep Learning fundamentals, and AI-based problem solving. Hands-on experience in predictive modeling, data preprocessing, feature engineering, automation, OCR, object detection, and intelligent systems using Pandas, NumPy, Scikit-learn, and Matplotlib. Strong analytical thinking, teamwork, and communication skills.

Education

Don Bosco Institute of Technology — Jul 2022 – Jun 2026
Bachelor of Computer Science and Engineering (Artificial Intelligence and Machine Learning) — Bengaluru
CGPA: 8.31
Relevant Coursework: Java Programming, Python Programming, Data Structures & Algorithms, Machine Learning

SBGNS Rural Comp PU College — Sep 2020 – Apr 2022
Pre-University College — Chikkaballapur
Percentage: 72.83
Coursework: Physics, Chemistry, Mathematics, Biology

Technical Skills

Programming: Python, Java Basics , JavaScript, HTML, CSS

Libraries: NumPy, Pandas, Matplotlib, Scikit-learn

Tools & Platforms: Spyder, Jupyter Notebook, VS Code, Node-RED, Firebase, Microsoft Excel

Concepts: Data Structures, Artificial Intelligence, Machine Learning Basics, Data Analysis

Projects

Manufacturing Output Prediction System — Aug 2025 – Sep 2025

- Built a regression-based machine learning model to predict machine output per hour using data preprocessing, feature selection, and predictive analytics.
- Developed and evaluated the solution using Python, Scikit-learn, Pandas, NumPy, and Matplotlib.

Artificial Intelligence Companion for Visually Impaired — May 2025 – Oct 2025

- Created AI-powered smart glasses with object detection, OCR, and voice feedback for safe navigation and reading assistance.

Internet of Robotic Things — Jun 2025 – Nov 2025

- Developed an IoT-based robotic system using Raspberry Pi and Node-RED for remote monitoring, control, and live video streaming.

Drowsiness Detection using Arduino — Dec 2024 – Apr 2025

- Built a driver drowsiness detection system using Arduino and IR sensors to monitor eye movement and generate real-time alerts.

Additional Projects

- Smart Surveillance Snapshot System
- Location Tracking and Firebase Integration
- License Plate Detection System

Certifications

- Artificial Intelligence and Machine Learning Foundations — TNS India Foundation (Aug 2025 – Nov 2025)
- Internet of Things — Samsung Innovation Campus (Dec 2024 – Feb 2025)
- Data Science, Artificial Intelligence — Corizo (Oct 2024 – Jan 2025)
- Machine Learning using Python, Introduction to Python — Infosys Springboard (Jan 2024 – Apr 2025)

Soft Skills

- Collaboration and teamwork
- Problem-solving and analytical thinking
- Adaptability to new technologies
- Communication with technical and non-technical teams
