Career Objective

Aspiring AI & Data Science Engineer passionate about Machine Learning, NLP, Data Analytics, and Intelligent Systems. Seeking opportunities to apply AI skills to real-world business problems.

Education

B.Tech in Artificial Intelligence & Data Science
XYZ Institute of Technology
CGPA: 8.7/10

Technical Skills

Programming: Python, SQL, Java
AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision
Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, OpenCV
Visualization: Power BI, Tableau, Matplotlib
Web: Flask, HTML, CSS
Database: MySQL

Projects

1. AI-Based Job Recommendation System
 - Developed a resume analyzer using NLP and Machine Learning.
 - Recommended jobs based on skills and experience.
 - Generated skill gap analysis and learning suggestions.
2. Smart Attendance System
 - Built a face recognition attendance system using OpenCV.

- Automated attendance tracking and reporting.

3. Sales Prediction System

- Created ML model for sales forecasting using regression techniques.

Internship

AI & Data Science Intern at ABC Technologies

- Worked on data preprocessing, dashboard creation, and machine learning models.

Certifications

- Python for Data Science – Coursera
- Machine Learning Specialization – Stanford Online
- SQL for Data Analytics – Udemy
- Data Visualization with Power BI

Soft Skills

Problem Solving, Communication, Teamwork, Critical Thinking

Achievements

- Finalist in National Level AI Hackathon
- Presented research paper on AI-based recommendation systems
